Design Process

Design Outcome:

- Simple/Minimalistic
- Elegant
- Warm Colour Palette
- But high contrast
- Website title very prominent

Technical Outcome:

- Mobile-first development
- Totally Responsive
- Easy to Read
- Easy to Navigate
- Modular (ie colors)
- Backend-ready

Mobile Mockup

3 Main Components:

- Across mobile, tablet and desktop
- Hamburger Menu
- Index Page Structure
- Content Page Structure

About

Leverage agile frameworks to provide a robust synopsis for high level overviews. Iterative approaches to corporate strategy foster collaborative thinking to further the overall value proposition. Organically grow the holistic world view of disruptive innovation via workplace diversity and empowerment.

Bring to the table win-win survival strategies to ensure proactive domination. At the end of the day, going forward, a new normal that has evolved from generation X is on the runway heading towards a streamlined cloud solution.

```
W 17:58 +
P 15:53 ++
sp 2015 bin -> usr/bin
sp 09:31 boot
sep 15:50 dev
sep 09:32 etc
Sep 15:52 home
Sep 2015 lib -> usr/lib
Sep 2015 lib64
Jul 10:01 lost-found
Aug 22:45 met
Sep 2015 opt
1. Sep 15:52 private -> /home/encrj
12. Aug 15:57 root
12. Sep 15:50 root
16. Sep 2015 sep
1. 20. Sep 2015 sbia -> usr/bin
1. 21. Sep 2015 +-+
16. 13. Aug 15:45 sra

About

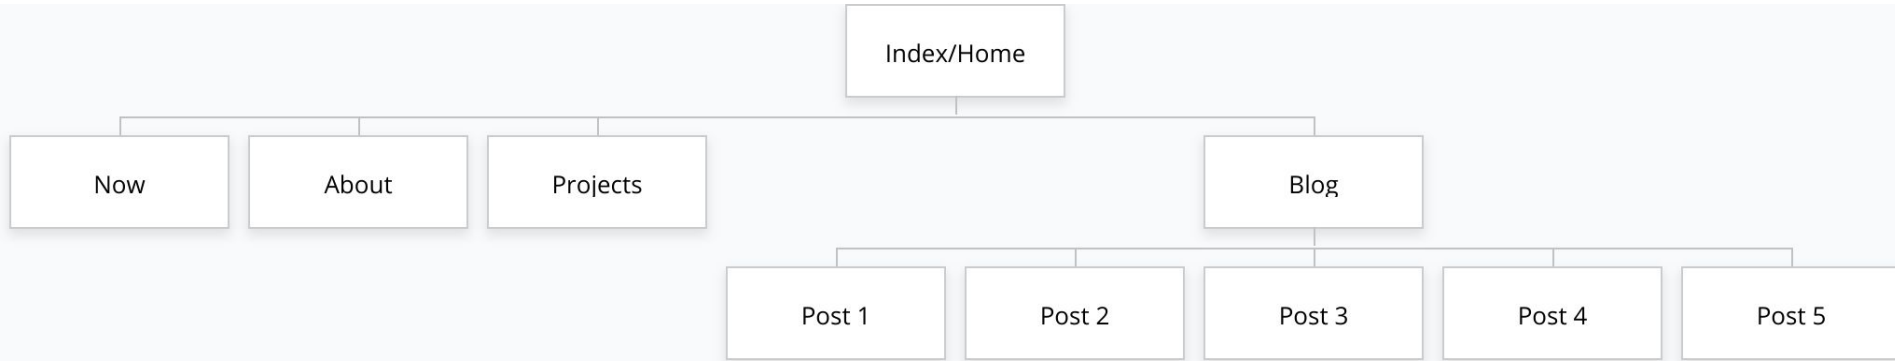

Leverage agile frameworks to provide a robust synopsis for high level overviews. Iterative approaches to corporate strategy foster collaborative thinking to further the overall value proposition. Organically grow the holistic world view of disruptive innovation via workplace diversity and empowerment.

Bring to the table win-win survival strategies to ensure proactive domination. At the end of the day, going forward, a new normal that has evolved from generation X is on the runway heading towards a streamlined cloud solution.

User generated content in real-time will have multiple touchpoints for offshoring. Capitalize on low hanging fruit to identify a ballpark value added activity to beta test. Override the digital divide with additional clickthroughs from DevOps. Nanotechnology immersion along the information highway will close the loop on focusing solely on the bottom line.

Sitemap

Pages:

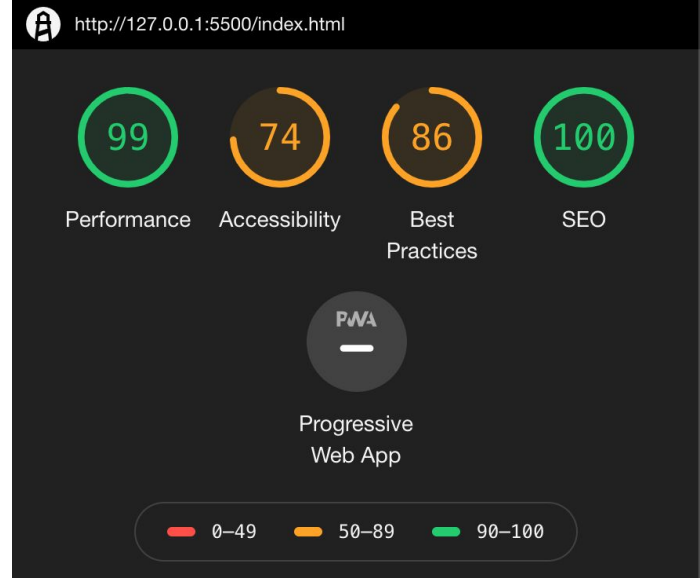

- Index (also called home)
- Now
- About
- Projects
- Blog
 - Blog posts 1-5

With:

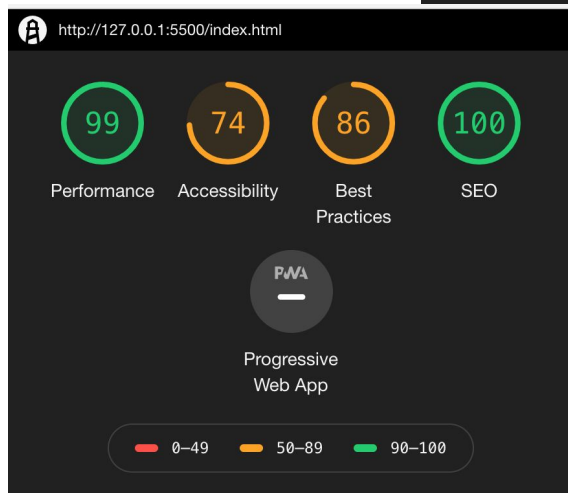

- Hamburger Menu in all pages (html pages)
- Index Page structure for Index/Home page across all device sizes
- Content Page Structure for Now, About, Projects, Blog and Post pages

Development - Challenges

- Accessibility
 - SRI
 - No google fonts support
 - Broke my code
 - Leave it till the end?
 - IE vs Chrome vs Safari
 - Ipad vs Windows vs Mac
 - Favourite support
- troubleshooting advice: just install chrome

Mobile

Desktop

Development - Ethical Issues

- Copyright
 - Framework logos
 - Copyright-free images
 - Do we need to give credit?
- Accessibility
 - Color-blindness
 - Awareness is the first step
 - Blacked out screen trying to navigate through google etc
 - Exercise I kept thinking about during development

Development - Favourite Parts

- Learning to create responsive projects
 - Flexbox
 - CSS/SCSS
- Putting something from my imagination onto a website
 - Is this a superpower?
- Going through the entire webdev process in order (as opposed to last time)
 - Inspiration -> Planning -> Mockups -> Development -> Testing -> Development -> Testing -> Deploying
- Portrait AND Landscape

Final Product

Index.html

Components:

- Title Div
- Text-Content Div
- Social Icons Div
- Hamburger Menu

[Home](#)

[Now](#)

[About](#)

[Projects](#)

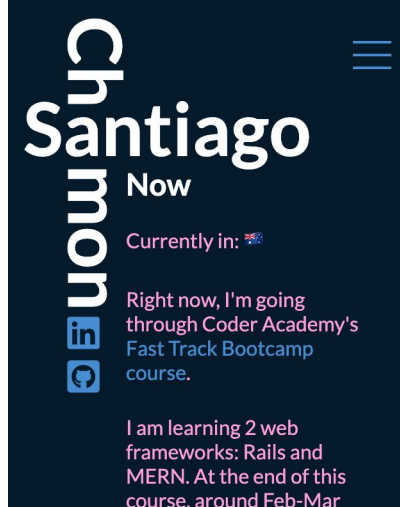

[Blog](#)

Final Product

- Now.html
- About.html
- Projects.html
- Blog.html
- Posts1-5.html

Components:

- Title Div (diff position)
- Social Icons Div
- Text-Content Div
- Hamburger Menu
- Variety of divs, p tags, img tags and i tags

Final Product
